

## Bradfield Organic Lawn Care Program

### Bradfield Corn Gluten (9-0-0)

Corn Gluten is a slow release, nitrogen rich fertilizer that is completely safe around people, pets, and all life that is in and around the soil. As well as being high in nitrogen, it has been observed that root systems from newly germinated seeds tend to wither in the presence of corn gluten.

### Bradfield Lawn and Garden (3-1-5)

Lawn and Garden is an all-purpose, all-season fertilizer. It is environmentally friendly and non-polluting of surface and ground waters. Bradfield natural fertilizer is made from a nutrient rich blend of alfalfa, potash, molasses, poultry protein and humates.

### Bradfield Horticultural Vinegar Herbicide

Horticultural Vinegar is many times stronger than the vinegar you buy at the grocery store, and it is a staple in organic weed control. Bradfield includes a yucca extract in their vinegar which increases effectiveness by acting as a spreader-sticker. Be careful, though, this is a non-selective product used for spot weed control, and will kill any green material it comes in contact with, so apply cautiously!

1 year program for a 5,000 sq. ft. lawn includes:  
 5 - 40 lb. bags of Corn Gluten  
 3 - 35 lb. bags of Lawn & Garden  
 1 - Gallon of Horticultural Vinegar

### FREE BONUS...

Receive 1 pint of American Brand Thuricide (BT), natural insecticide, with purchase of complete one year Bradfield lawn care program

**FREE use of spreader!!**

**Johnson's will store products until you are ready to use them!!**
